Work smarter, faster, and with higher quality.

QuickCapture Pro brings paper and electronic business activities into a uniform, streamlined document workflow.

Nuance QuickCapture Pro® is an easy to use Windows-based software application that lets you use your PC connected TWAIN or ISIS scanner to scan, view, index, enhance and manage documents. QuickCapture Pro lets you capture documents from your hard drive or with your PC connected document scanner easily, then connect to virtually any Nuance AutoStore® orchestrated workflow.

With QuickCapture Pro, you can work smarter, faster, and with higher quality. The software's advanced image filtering capabilities allow users to improve document quality before documents enter the business workflow. Indexing files goes faster and production scans run more efficiently.

Use the program to validate scans as they are processed, enter data associated with the scan, or make adjustments to optimize image results.

Leverage your PC connected document scanners.
Nuance QuickCapture Pro allows you to leverage your existing TWAIN document scanners.

Benefits:
– Ideal for low volume remote offices having no multifunction device, or for mid- to high-volume applications using a variety of media types—or if frequent dual-sided scanning is needed.

– Appropriate for complex scans. The software provides a complementary solution to multifunction peripherals (MFPs), which are more suited for low-complexity capture workflows with minimal data entry or capture manipulation requirements.

– Integrates desktop scanners that do not have an embedded client experience with AutoStore. Also a perfect addition for legacy low-end scanner devices.

Key features
– Improves document quality before documents enter the business workflow. Indexing of files goes faster and production scans run more efficiently.
– Validates scans as they are processed, letting you enter data associated with the scan, or make adjustments to optimize image results.
– Provides PC scanner users with an easy to use interface for capturing index data directly from scanned documents.
– Permits different types of workstation users, working in different office settings, with different workloads to effectively capture their documents and push them into the orchestrated workflows.
– Allows you to preview captured or imported documents at the desktop before pushing them into the Nuance AutoStore orchestrated workflow.
– Captures index data directly from scanned documents using SnapIt™ technology.

SnapIt™: don't type, just click!

SnapIt™ provides PC scanner users with an easy to use interface for capturing index data directly from scanned documents. Each time the user scans a document, SnapIt recognizes and highlights the various index fields. The user simply points to the highlighted field or draws a lasso box around the data, clicks once, and the values populate automatically to the index fields.

Benefits:
– Improves the speed and quality of data entry or indexing by eliminating manual steps normally associated with indexing documents.

– Guides the user by highlighting the relevant data on image.

– Allows your highly skilled employees to focus on more challenging tasks.

Easy to learn intuitive interface.

QuickCapture Pro has an intuitive interface that guides you to the result directly, making it easy to learn and handle upon configuration.

Benefits:
– Fits the application interface to the personal preference of the user.

– Movable panels let you design your own view. Top right and middle panels display the scanned document in thumbnails and page view. Top left and bottom show the indexing forms and fields.

– Save time through point and click indexing.

System Requirements.

Server:
– Windows Server 2012 R2 — Standard and Datacenter
– Windows Server 2012: Standard and Datacenter with the latest service pack
– Windows Server 2008 R2: Standard, Enterprise, and Datacenter with the latest service pack
– Windows Server 2008 (32\64 bit): Standard, Enterprise, and Datacenter with the latest service pack
– Windows 8/8.1 (32\64 bit: Pro and Enterprise
– Windows 7 (32\64 bit): Professional, Ultimate, and Enterprise with the latest
– service pack

Note: Small Business Server/domain controllers are not supported for installing AutoStore.

KYOCERA
Document Solutions

"At Bunge Foods and Fertilizer, one of the largest international conglomerates, we depend on QuickCapture Pro and AutoStore to process more than 15,000 financial documents daily, from more than 50 data entry points throughout Brazil. Indexed documents uploaded directly into the company's SharePoint® system from these remote locations allow our company's Central Services Unit to process the information efficiently."

Ulisses de Oliveira
Central Services Coordinator
Bunge Foods and Fertilizers, São Paulo, Brazil

Adaptable solution.
Allows different types of workstation users, working in different office settings, with different workloads, to effectively capture their documents and push them into the orchestrated workflows.

Benefits:
– Remote office workers can feed documents more quickly into business processes.

– Customers sensitive to quality can review, edit and enhance images before they enter the workflows.

– Flexible, efficient solution for individuals and production teams managing large scans. Supports clustering and load-balancing for business critical scanning.

– Leverages Nuance AutoStore® to connect with more than 40+ back-end systems.

Document preview delivers high quality images.
Nuance QuickCapture Pro allows you to preview captured or imported documents at the desktop before pushing them into a Nuance AutoStore orchestrated workflow. Users can improve the quality of the documents by applying image filtering capabilities to improve document readability, image clarity, and optical character recognition.

Benefits:
– Remove lines, dots, borders, hole-punches.

– Deskew, despeckle, invert text, resize image, smooth text, adjust color resolution.

– Add, delete, rotate pages.

Barcode indexing drives process and efficiency.
Nuance QuickCapture Pro lets you maximize the use of barcodes by capturing barcode information, and converting and using it as barcode indexing. Barcode indexing is set easily from highlighted barcodes embedded on a page or by using SnapIt technology.

Benefits:
– Barcode indexing allows you to release documents into different workflows.

– Barcode indexing results in more accurate delivery of documents to appropriate back-end systems.

– Lets users separate large scans into smaller documents that are processed and routed automatically, saving time.
